&
TIVOLI
XLV

SSANGYONG

STYLISH & VERSATILE

Tivoli has a unique talent combining style with practicality, fun with versatility, and comfort

with technology – all in a compact package.

If that wasn't enough there's also Tivoli XLV, the Tivoli estate that gives even greater load space – the biggest of any small SUV.

Whatever you need on your journey – bikes, golf clubs or luggage for five – Tivoli and Tivoli XLV have the answer; the perfect vehicles for those who want to downsize without compromise.

STYLED TO EXCITE

SsangYong use a design theme they call 'nature, born 3 motion' which can sound a little strange to Europeans, but it draws from the combination of Korea's mountainous, wooded terrain together with the subtleties of eastern aesthetics.

The result is a stylish proposition whether on the street or off the road, Tivoli's elegant shape has great proportions, a strong front face which features the subtle silhouette of a bird's wings, topped by a swept back 'floating' roofline reminiscent of premium SUVs.

Finished with details such as projection headlamps, stylish LED positioning lights front and rear, LED repeaters on the door mirrors (Ultimate), smart 18" alloys (ELX and Ultimate) and clean purposeful lines, Tivoli really stands out from the crowd.

SPACIOUS & REFINED

Tivoli redefines the standard for interior style and trim for a small crossover. Award-winning super comfortable front seats, enough rear seat space for three passengers, a chunky D-cut steering wheel that looks and feels good and a fascia that's ergonomic, modern and purposeful, together create an upmarket ambience.

That ambience is carried over to upholstery with Ultimate models featuring leather trim and seat heaters front and rear – something rarely seen in small SUVs. Entry level SE models are trimmed with deluxe fabric, EX and ELX models feature smartly designed leather-look and cloth seats, with front seat heaters. This gives Tivoli an interior usually found in vehicles at twice the price and makes travelling in a Tivoli very special indeed.

AN INTERIOR FULL OF FEATURES

SMART INSTRUMENT CLUSTER

Tivoli Ultimate features a smart cluster that allows you to change its colour depending on your mood, with separate settings for night and day which help identify whether headlamps are on or off in marginal conditions.

There's also a sophisticated trip computer on all Tivolis that shows tyre pressures, distance to empty, distance travelled and outside temperature.

INFOTAINMENT

Tivoli features cutting-edge technology to connect you to the outside world – all models use Bluetooth technology to connect to your phone and can also stream music via a USB connection.

Tivoli ELX models feature a neat 7" touchscreen-driven system which has DAB radio for the clearest of sounds and adds Apple Carplay and Android Auto to connect to the contents of your phone, for navigation, music, podcasts or to make calls.

Tivoli XLV and Tivoli Ultimate upgrade further to include full European TomTom navigation which will find your route regardless of phone reception.

The 7" screen also helps out when reversing with ELX and Ultimate models fitted with a rear view camera.

AIR CONDITIONING

Tivoli SE and EX are equipped with manually controlled air conditioning to keep you cool whatever the weather.

However, ELX and Ultimate models feature a clever dual-zone air conditioning system which allows driver and passenger to set individual temperatures.

SMART STEERING

NORMAL

The steering wheel effort is balanced and precise and is ideal for general driving.

COMFORT

The steering wheel turns with less effort than when in Normal mode, good for use when parking, backing up or going forward at low speed.

SPORT

The steering wheel turns with greater effort than Normal mode, boosting steering responsiveness at high speed to give a little more steering feel and precision as required.

HEATED SEATS

You may be aware that it gets pretty cold in Korea during winter and so it's a pleasure to find a mini SUV with heated front seats (EX and ELX) and with the added opulence of heated rear seats (Tivoli XLV Ultimate) – why should the front seat passengers have all the fun!

HEATED STEERING WHEEL

Once you've experienced a heated steering wheel you'll never want to go back – essential in Korea and standard with Tivoli Ultimate models – it's the ultimate winter must...

TIVOLI - SPACE & STORAGE

Tivoli is one of the biggest cars in its class with interior dimensions that can embarrass vehicles from the class above.

There's room for the essentials of life with loads of storage spaces throughout the interior together with a large flexible loadspace that adapts to suit your requirements.

Tivoli's rear loadspace is amongst the best in class at 423 litres, and Tivoli's width and height mean that it could accommodate three golf bags, and more.

That all adds up to make Tivoli just as practical as it is elegant.

TIVOLI XLV – MORE LOADSPACE THAN ANY OTHER SMALL SUV

Adding an additional 245mm to the rear of Tivoli makes an amazing difference to boot space. With up to 720 litres available, Tivoli XLV has more loadspace than any vehicle from the class above.

That means more space for your family, more space for their luggage and more space for your lifestyle – whatever the challenge presented to our small SUV estate, the Tivoli XLV takes it in its stride.

TECHNICAL

A choice of ultra-modern petrol or diesel 1.6 litre engines, 6 speed manual or Aisin 6 speed automatic transmissions and rated to the latest Euro 6c emissions standards means that there's a Tivoli for every requirement.

AISIN
6 SPEED
GEARBOX

TRANSMISSIONS

Tivoli has a choice of two modern and efficient 6 speed gearboxes – manual and automatic. Matched with our new 1.6 litre petrol and diesel engines which complement your driving style with smooth shifts and well-chosen gear ratios.

The automatic gearbox is sourced from Japanese supplier Aisin and is well proven and respected across the industry.

- 300Nm @ 1,500 rpm

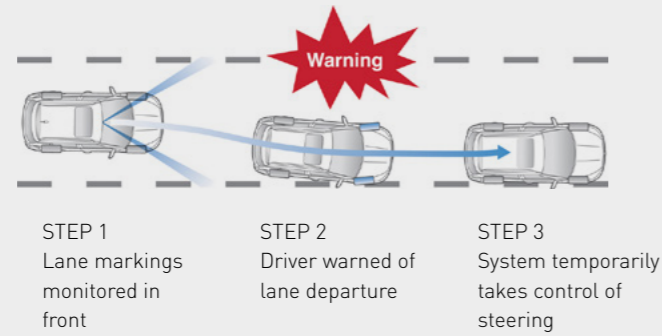

SMART SAFETY

FORWARD COLLISION WARNING AND AUTONOMOUS EMERGENCY BRAKING

Evaluating data from the vehicle's on board camera, Forward Collision Warning (FCW) can detect a potential collision with a vehicle, pedestrian or obstacle. If a collision appears imminent FCW will warn the driver, and if there is insufficient response Autonomous Emergency Braking (AEB) will intervene with appropriate braking force to stop the vehicle or minimise damage.

LANE DEPARTURE WARNING AND LANE KEEPING ASSIST

Lane Departure Warning (LDW) is designed to alert the driver that the vehicle is about to deviate from a traffic lane. Lane Keeping Assist (LKA) then helps the car stay toward the centre of the lane by applying a small amount of counter-steering force.

TRAFFIC SIGN RECOGNITION (TSR)

The system recognises speed limit signs and provides the driver with an on-screen warning reminder.

HIGH BEAM ASSIST (HBA)

Detects oncoming vehicles and dips high beams. The system also tracks the taillights of vehicles in front and dips the high beams accordingly.

PASSIVE SAFETY

HIGH STRENGTH STEEL CONSTRUCTION

STRENGTH

The basis of a vehicle's safety is its monocoque structure – both how it's made and how it responds on impact. SsangYong's engineers have made extensive use of high strength steel to construct a rigid passenger cell.

NCAP 4 STAR RATED

ISOFIX

Tivoli is equipped with ISOFIX child seat mountings to the rear outer seats to allow firm and rigid attachment.

SEAT BELT PRE-TENSIONERS

In the event of a collision, the pre-tensioner immediately tightens the seatbelt over the chest and lap, ensuring the occupant is in the best possible restrained position if the airbags are deployed.

AIRBAGS

Tivoli is equipped with 7 airbags (not SE) for maximum passenger protection on impact – the most in its class. These include a driver's knee protection airbag – a feature normally found in prestige vehicles.

ACTIVE SAFETY

Tivoli is equipped with the latest technology to assist the driver to avoid accidents.

EBD — ABS

ELECTRONIC BRAKEFORCE DISTRIBUTION
ANTI-LOCK BRAKE SYSTEM

Brake force is distributed appropriately to the front and rear wheels according to the vehicular load of persons and/or cargo.

BAS

BRAKE ASSIST SYSTEM

When this electronically controlled system senses the driver emergency braking it assists by applying full braking effort automatically to reduce the vehicle's braking distance and to help avoid an accident.

TPMS

Tivoli has tyre pressure monitoring built into its electronics. Monitored through the trip computer, each tyre is continually checked for pressure with the driver immediately warned of unsafe inflation.

ESP

ELECTRONIC STABILITY PROGRAMME

The electronic stability programme monitors road conditions and vehicular status constantly, adjusting engine output and braking whenever the driver is about to lose control. The ESP integrates the anti-lock brake system, active rollover protection, anti-slip regulation and brake-force assist to improve Tivoli's intervention capabilities.

FINISHING TOUCHES

SMART KEY SYSTEM

Tivoli Ultimate starts at the push of a button! Once the key fob is detected, the driver's door can be opened with a button and the car started allowing the fob to be left in your pocket or bag.

REAR VIEW CAMERA

It's always better to see clearly what's behind when reversing and Tivoli's 7" screen (ELX and above) links with a rear view camera to allow you to access the smallest of spaces.

REMOTE CONTROLS

Tivoli's D-cut steering wheel has controls at your fingertips. The radio unit and phone are controlled on the left and cruise control is on the right.

CRUISE CONTROL

To maximise fuel efficiency all Tivoli's are equipped with electronic cruise control. The steering wheel mounted controls allow the driver to maintain a set speed without touching the accelerator.

PARKING SENSORS

Tivoli Ultimate models feature front and rear parking sensors to add audible instruction to parking on tight spaces.

The new Worldwide Harmonised Light Vehicle Test Procedure (WLTP) standard of measuring fuel consumption and CO2 emissions in passenger cars is being introduced from Jan 2019. It is a more accurate measure of a vehicles performance than the outgoing NEDC (New European driving cycle) system which remains in place as a measure of CO2 for taxation purposes until April 2020. For more information see our website. A guide to fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO2 emissions. CO2 is the main greenhouse gas responsible for global warming.
