ABOVE & BEYOND

Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomise the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

RANGE ROVER

Reflecting its unrivalled heritage, Range Rover takes design, comfort and craftsmanship to extraordinary new heights. As striking on the outside as it is refined within, its performance and capability are peerless. Exemplary levels of comfort and technology bring you a heightened sense of effortless sophistication and a truly first-class travel experience.

INTRODUCTION

INTRODUCING RANGE ROVER

SETTING NEW STANDARDS

Whether on Place du Casino, Monaco, or some muddy track in Warwickshire, England, Range Rover has always been synonymous with supreme refinement, capability and distinctive design cues such as its signature floating roofline, continuous waistline and lower accent graphic. A more spacious interior, together with executive rear seating, offers an exemplary level of comfort for driver and passengers.

To ensure outstanding performance and great fuel efficiency, our new 360PS and 400PS 6-cylinder petrol engine incorporates Mild Hybrid Electric Vehicle (MHEV) technology. This system, along with other measures, also reduces CO₂ emissions and improves driveability. See page 25.

Whilst the level of technology, which includes Driver Assist Pack, LED lighting, the Touch Pro Duo infotainment system, full colour Head-up Display and seven mode Terrain Response with Comfort Mode, delivers an even more luxurious driving experience.

We haven't set out to reimagine Range Rover, we've simply made it better.

LIGHTING TECHNOLOGY

All-round exterior LED lighting is standard. Designed to last the lifetime of the vehicle, LED lights are more energy-efficient and the quality of light produced is closer to daylight conditions, so driving at night becomes less tiring. Innovative Pixel-laser LED headlights provide the ultimate option and give the vehicle even greater presence. See page 47.

SUPREME ALL TERRAIN CAPABILITY

Off-road driving is assured and precise thanks to All Wheel Drive. Electronic Air Suspension helps deliver an even more confident off-road experience as you can raise the vehicle by some 75mm. Such features as All Terrain Progress Control reaffirm your sense of composure. See pages 27-29.

COMPOSED TOWING

You can tow up to 3,500kg with consummate ease and a suite of specific optional technologies, such as Advanced Tow Assist, ensures you can drive, manoeuvre and park with the least amount of fuss. See page 52.

POWERTRAINS

From power and sheer driving pleasure to fuel economy and refinement, there is a range of engines available including petrol, diesel, Mild Hybrid and Plug-in Hybrid: each has been optimised with Comfort and Dynamic modes to cater for all needs. All engines are equipped with Stop/Start technology and smart regenerative charging. See pages 20-25.

*Applicable to vehicles fitted with rear Executive Class seating only.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer.

Vehicle shown: Range Rover Autobiography in Byron Blue with optional features fitted (market dependent).

LUXURY ENVIRONMENT

With a sublime and beautifully appointed interior, Range Rover takes luxury to even greater heights. Rear seats now have increased recline and all seats have deeper cushioning for greater comfort, whilst optional 10" Rear Seat Entertainment with Touchscreens ensures passengers also enjoy optimum levels of entertainment. Veneers and trim finishers further enhance the sense of unmatched refinement. See pages 15-17.

INTELLIGENT VERSATILITY

The vehicle provides increased levels of versatility. Ample storage solutions include a deep centre console stowage compartment, whilst the ability to fold the rear seats means it can adapt to suit your specific needs. Intelligent Seat Cargo Mode with power recline and Convenience Fold* with Remote Intelligent Seat Fold allow you to make more of your vehicle. Automatic Access Height, Easy Loading and an Activity Key help ensure easy entry, exit and loading. Up to 7 x USB ports, 5 x 12V power sockets, 2 x domestic power sockets and 4G Wi-Fi ensure you can all stay connected. See pages 48-51.

Actual seats have new cushions and interlayers with softer looser leather to optimise these features. Please refer to your Land Rover Retailer for more information.

ELEGANT REAR SEATING

Range Rover is fitted with 60:40 bench seating with load-through as standard. The option of rear Executive Class seating with a power deployable rear centre console and folding rear seats deliver exceptional five-seat versatility with the ability to provide four-seat comfort. Passenger comfort is further enhanced through features such as Extreme Passenger Seat Away and one-touch recline. Choose Long Wheelbase to enjoy an additional 192mm rear legroom. See pages 18-19.

SEAMLESSLY INTEGRATED TECHNOLOGY

Touch Pro Duo has two 10" high-definition Touchscreens to ensure you stay connected and entertained. This is complemented by the 12.3" Interactive Driver Display with configurable touch steering wheel controls and our second generation full colour Head-up Display. See page 31.

INTERIOR COMFORT AND WELLBEING

Command Driving Position ensures you enjoy a greater view of your surroundings and the road ahead. Configurable Ambient Lighting and Enhanced Task Lighting complement the interior ambience while Cabin Air Ionisation provides a consistently fresh environment for all occupants. And for an even more sophisticated ride, thicker door glass and better acoustic insulation make this vehicle the quietest Range Rover ever. See pages 15 and 48.

RANGE ROVER PLUG-IN HYBRID ELECTRIC VEHICLE

Capability, performance and cutting-edge technologies are at the heart of every Land Rover. Taking our vehicles into the future, electric power now propels us into an exciting new era. Our first ever Plug-in Hybrid Electric Vehicle (PHEV)¹, is driven by our most innovative powertrain yet; an advanced Ingenium petrol engine and electric motor combine to give a composed and luxurious ride, with full Range Rover capability². With a full electric charge, PHEV is capable of managing most city commutes. Drivers can select from two driving modes to best suit their needs. See pages 20-23 for details.

Parallel Hybrid mode (the default driving mode) - combined petrol and electric drive. When in Parallel Hybrid mode, the driver can optimise battery charge or fuel economy by utilising two alternative charge management functions:

SAVE function - prevents the battery charge dropping below the level which has been selected

Predictive Energy Optimisation (PEO) function - by entering a destination in the Navigation system, the driver enables the feature, which utilises altitude data for the route selected to intelligently switch between the electric motor and petrol engine to maximise fuel economy

EV (Electric Vehicle) mode - full electric drive³.

In addition to the benefits described above, an increasing number of major cities are introducing vehicle restrictions and charges from which drivers of PHEV vehicles could be exempt.

LOW CO₂ EMISSIONS²

PHEV's CO₂ emissions make it our lowest emission powertrain yet. See page 20.

¹Market dependent. ²Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy. Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels. ³Parallel Hybrid mode will be automatically re-engaged should the driver require more power or torque than is available, or the battery drops to an insufficient level to maintain progress.

Rear loadspace capacity is reduced on P400e models; please see page 50 for more details.

Engine data has not been re-certified in 2019. Data shown conforms to the 2017 NEDC certification.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer.

Vehicle shown: Range Rover is Autobiography Long Wheelbase in Aruba with optional features fitted (market dependent).

EV RANGE

PHEV is fully capable of managing most city commutes in full Electric Vehicle (EV) mode². See page 20.

EASY OVERNIGHT CHARGING

PHEV can fully charge from a domestic electricity supply in as little as 7.5 hours so it's ideally suited to charging at home overnight. See page 20.

CHARGING SOLUTIONS

A full charge can be achieved in as little as 2.75 hours⁴ at home using the accessory multi-function charging cable and a dedicated wall box or 32 amp industrial type socket. In addition, a range of charging points can be used at offices and other designated public places. See pages 20-23.

REFINED DRIVE

Our quietest Range Rover yet, PHEV delivers a virtually silent drive in full EV mode. PHEV ensures seamless transition between the petrol engine and electric motor, delivering optimal refinement. See page 21.

NO COMPROMISE ON CAPABILITY AND PERFORMANCE

It is fully capable of handling off-road situations such as wading and rock crawl. Its on-road performance is equally remarkable, delivering additional power when you need it most¹. See page 21.

CABIN PRECONDITIONING

You can pre-heat or, uniquely to PHEV, pre-cool the cabin before you get into the vehicle without starting the engine, making life that bit more comfortable. See page 21.

SEAMLESS DESIGN

Integrating the charging port into the front grille provides easy connection without compromising the vehicle's iconic design. See page 20.

⁴Charging times will vary by market, power supply and charging solution. Please refer to landrover-me.com/RangeRover for further information.

DESIGN

EXTERIOR

With its floating roof, continuous waistline and lower accents, Range Rover's silhouette is recognised around the world. Those commanding looks have been given an even more contemporary profile. The front grille signals a more prominent appearance, whilst the clamshell bonnet, formed from a single sheet of aluminium, is now smoother and longer to augment the vehicle's more formal, upright profile. The front bumper – including vent finishers, side vent graphics, side accent graphics and integrated exhausts – helps advance the vehicle's effortless design. A choice of Atlas or Satin body-coloured side graphics, optional design packs and new wheel designs add further appeal, whilst striking Pixel-laser headlights (see page 47) and rear LED lights reinforce the vehicle's distinctive features.

Vehicle shown: Range Rover Autobiography in Byron Blue with optional features fitted (market dependent).

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.

INTERIOR

Sumptuously designed, Range Rover's interior is a tranquil haven. Effortlessly comfortable, superbly appointed and finished with a forensic eye for the details, every facet of the interior has been designed and engineered to deliver class-leading comfort for all occupants.

Thanks to Range Rover's unique Command Driving Position, the driver continues to enjoy an enhanced view of the road ahead, but now does so in even greater comfort than before. Cossetted in premium materials such as Semi-Aniline leather, wider seats and deeper cushioning with soft foam interlayers help create the most luxurious environment. Combined with enhanced seat functionality including the optional upper seat shoulder support and 'Hot Stone' massage, along with intuitive controls using the door mounted seat control switches, the interior of the Range Rover is the ultimate in refinement.

Seamlessly integrated technologies built around the Touch Pro Duo Touchscreens and Interactive Driver Display embody our design ethos; cleaner, crisper lines and fewer dials - delivering an uncluttered console that doesn't distract the driver. Veneers and luxury finishers amplify the vehicle's refined design cues, whilst enhanced Configurable Ambient Lighting with a choice of ten colours adds greatly to the overall sense of calm. Additional integrated stowage solutions including a centre console deep stowage compartment, and other optional features such as the front centre console refrigerator compartment confirm a purity of craft everywhere you look and touch.

No matter how far you travel in a Range Rover, you'll always arrive as refreshed as when you set out. It's not where you go, it's how you get there.

Interior shown: Range Rover Autobiography in Navy/Ivory with optional features fitted (market dependent). Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.

Everyone who travels in Range Rover does so in the utmost comfort and style. Refinement is everywhere you look and in everything you touch; nothing exemplifies this better than the rear Executive Class seating, standard on Autobiography.

As with the front, the rear also features wider seats with deeper cushioning. The rear Executive Class seats take this to another level. When lowered, a power deployable centre console with premium veneer finishers and clever stowage solutions integrates seamlessly with the two outer passenger seats, creating a luxury four-seat environment. And at the touch of a button, Extreme Passenger Seat Away will adjust the front passenger seat forward to maximise the rear passenger's space and forward visibility, whilst the extended recline and integrated side cushions mean the passenger can adjust their seat into their optimum position.

Optional Executive Class Comfort features, including adjustable bolsters, upper seat shoulder support, headrest pillows and 'Hot Stone' massage further enhance the rear passenger's journey. Whilst additional Executive Class Comfort Plus features, such as heated armrests, heated calf rest and a footrest with a dedicated area to warm your feet create a truly luxurious environment.

When you require increased versatility, simply retract the power deployable centre console to reveal a centre seat for a third occupant. Or for the first time, fold your rear Executive Class seats forward to maximise your loadspace using the Remote Intelligent Seat Fold application.

Other available features include Rear Seat Entertainment with 10" Touchscreens, and Connect Pro connectivity with 4G Wi-Fi for greater control of features such as seat massage, heating and cooling, and personal climate settings. Enhanced Task Lighting is provided as standard and comes with user selectable modes, including a bright light and a warm light setting for a more relaxed environment, making Range Rover the perfect partner for your journey.

Interior shown: Range Rover Autobiography Long Wheelbase in Ebony/Vintage Tan with optional features fitted (market dependent).

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.

Actual seats have new cushions and interlayers with softer, looser leather to optimise these features. Please refer to your Land Rover Retailer for more information.

Rear Executive Class seating with power deployable centre console stowed.

Rear Executive Class seating with power deployable centre console deployed.

RANGE ROVER LONG WHEELBASE

Range Rover Long Wheelbase is instantly recognisable, superbly engineered and beautifully appointed. Featuring a panoramic roof as standard, this body style is characterised by a distinctive 'L' badge mounted behind each front wheel arch. The exterior is extended by 200mm to facilitate an even more luxurious environment inside.

The definitive luxury SUV, the Range Rover Long Wheelbase has an additional 192mm of interior floorspace for even more passenger legroom and comfort.

Standard features include an added deep centre stowage compartment at the rear of the front centre console, electric rear side window sunblinds, Configurable Ambient Lighting and illuminated treadplates. With optional features such as Cabin Air Ionisation to improve the air quality within the cabin, and Four-zone Climate Control enabling personalised temperature control through an additional climate unit, passengers in the Range Rover Long Wheelbase can create their own tranquil haven.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer.

Vehicle shown: Range Rover Autobiography Long Wheelbase in Aruba with optional features fitted (market dependent).

Select the rear Executive Class Comfort Plus seats and not only do you get all the luxury features of the Standard Wheelbase, including Extreme Passenger Seat Away, heated armrests and 'Hot Stone' massage, you also get an additional heated calf rest - one for each side behind both driver and passenger. And, as with every Range Rover, the superbly crafted space is accompanied by the discerning use of the finest materials.

In Range Rover Long Wheelbase, every last detail combines to deliver the highest levels of luxury and refinement.

Actual seats have new cushions and interlayers with softer, looser leather to optimise these features. Please refer to your Land Rover Retailer for more information.

PERFORMANCE AND CAPABILITY

PLUG-IN HYBRID ELECTRIC VEHICLE

Designed and engineered for an increasingly carbon-conscious world, our Plug-in Hybrid Electric Vehicle (PHEV)¹, the P400e, delivers a dynamic driving experience with exceptional Range Rover capability both on and off road.

P400e uses the combination of an advanced 2.0 litre 300PS Si4 Ingenium Petrol engine supported by a high-capacity 105kW electric motor to deliver a combined output of 404PS. The electric motor can either supply its power in parallel with the engine, or drive the vehicle in the manually selectable Electric Vehicle (EV) Mode. The large 13kWh capacity battery gives the vehicle an all-electric range from a full charge, capable of managing most city commutes¹ with zero tailpipe emissions.

The P400e powertrain has been integrated seamlessly into the vehicle's design. The charging point is discreetly located in the front grille, which makes connection to a power supply both convenient and easy while lending itself to routine overnight home charging.

The battery can be fully charged in as little as 7.5 hours³ using the home charging cable supplied as standard. When rapid charging, a full charge can be achieved in as little as 2.75 hours³ at home using a dedicated wall box or 32 amp industrial-type socket, or at a range of public charging points using a public charging cable. For charging away from home, the cable can be stored in the vehicle's loadspace using a purpose designed storage case and retention system.

¹Market dependent. ²Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy. Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels. ³Charging times will vary by market, power supply and charging solution. Please refer to landrover-me.com/RangeRover for further information.

Rear loadspace capacity is reduced on P400e models; please see page 50 for more details.

Vehicles shown are from the Land Rover global range. Specifications, options and availability will vary between markets and should be verified with your local Land Rover Retailer.

Vehicle shown is Autobiography Long Wheelbase in Aruba with optional features fitted (market dependent).

The P400e delivers an exceptionally refined experience. The electric motor can produce its maximum torque from standstill and delivers a virtually silent drive. If engine torque is required, the system uses the Integrated Starter Generator (ISG) for virtually instant starting, enabling engine torque to be perfectly blended with electric motor torque, smoothly delivering the driver's demand using the hybrid integrated transmission.

Off-road capabilities are uncompromised and in some circumstances enhanced. Unlike any other plug-in hybrid vehicle, P400e matches the 900mm wading depth⁴ of Range Rover fitted with a conventional engine, and the additional torque provided by the electric motor at low speed is an advantage in a variety of off-road situations.

The combination of the instant torque from the electric motor with that from the highly efficient direct injection petrol engine delivers a torque profile normally associated with large capacity petrol or diesel engines, providing exceptional on-road performance².

For extra convenience, the vehicle can be defrosted whilst charging and journeys can begin with the cabin pre-conditioned to a comfortable temperature. The supplementary heater and air conditioning compressor - both powered by the high-voltage battery - will pre-cool or pre-warm the vehicle without the requirement to start the engine when charging, or from the battery alone if sufficient charge is available.

⁴Wading is only available when engine is engaged.

PLUG-IN HYBRID ELECTRIC VEHICLE

In Parallel Hybrid Mode (the default driving mode), the electric motor supplies its power in parallel with the engine. There is a seamless transition between the 105kW electric motor and the Si4 Ingenium Petrol engine, as the system smoothly starts the engine and then blends electric motor and petrol engine power together using the hybrid integrated transmission. Intelligent battery management, which charges the battery through regenerative braking and even when the vehicle is coasting, ensures P400e always has sufficient charge to provide 404PS power output to deliver seamlessly impressive performance when required.

When in the default driving mode (Parallel Hybrid) the driver can optimise fuel economy or battery charge by utilising one of two alternative charge management functions:

SAVE function - Manually selected through the Touchscreen, the SAVE function prevents the battery charge dropping below the level which has been selected. This allows the driver to provision for quiet, zero-emission travel at a later point in the journey. The vehicle will only use the electric motor if the battery has received a charge over and above the saved level through regenerative braking.

Predictive Energy Optimisation (PEO) function - Entering a destination in the vehicle's navigation system will automatically engage the PEO function. By utilising altitude data for the chosen route, PEO intelligently switches between the electric motor and petrol engine to maximise fuel economy throughout the journey.

In addition to operating as a parallel hybrid, the large capacity battery enables the driver to operate the vehicle in **EV (Electric Vehicle) Mode**. Manually selected by a button on the console, EV Mode enables the vehicle to run solely on the electric motor using the energy stored in the battery, the ideal solution for quiet, zero-emission journeys. The system will introduce the petrol engine should the driver require more power than is available through the electric motor alone, or if the battery charge drops to an insufficient level to maintain progress.

- 1** 105KW ELECTRIC MOTOR

PHEV features a high-power 105kW permanent magnet synchronous electric motor to deliver power effortlessly.
- 2** INTEGRATED HYBRID AUTOMATIC TRANSMISSION

A seamless transition from EV to Internal Combustion Engine is delivered via the hybrid integrated transmission.
- 3** 2.0 LITRE INGENIUM ENGINE

Developed and engineered by Jaguar Land Rover, our aluminium 2.0 litre 300PS Si4 Ingenium Petrol engine is lighter and more efficient than predecessors.
- 4** 13KWH HIGH-VOLTAGE BATTERY

The large capacity battery gives the vehicle an all-electric range, capable of managing most short commutes* from a full charge.
- 5** 7KW ONBOARD CHARGER

The powerful 7kW onboard charger can deliver a full battery charge in as little as 2.75 hours dependent on charging station capability.
- 6** INTEGRATED STARTER GENERATOR

The Integrated Starter Generator (ISG) delivers an exceptionally refined starting of the petrol engine when required.
- 7** REGENERATIVE BRAKING

Regenerative braking uses the electric motor to harvest kinetic energy whilst braking, converting it to electrical energy that is used to recharge the high-voltage battery.

*Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy. Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels.

ENGINES AND TRANSMISSION

From power and sheer driving pleasure to fuel economy and refinement, there is a range of engines available for Range Rover and each has been optimised for specific attributes to cater for all needs. All engines are equipped with Stop/Start technology* and smart regenerative charging (except P400e); this feature prioritises the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and reduce fuel consumption for maximum economy, especially during urban driving. For engine availability see pages 74-75.

8-SPEED AUTOMATIC TRANSMISSION

All diesel* and petrol engines in Range Rover are coupled with an 8-speed Automatic Transmission. With eight closely spaced ratios, the transmission ensures that you are always in the optimum gear, maximising fuel efficiency and acceleration. Gear changes are almost imperceptible and shift schedules intelligently adapt to your driving style.

MILD HYBRID ELECTRIC VEHICLE

Land Rover is at the forefront of sustainable innovation. Taking our vehicles into a smarter and more exciting future, Mild Hybrid Electric Vehicle (MHEV)* technology is a system that uses a belt-driven starter generator and a state-of-the-art 48V battery. These harvest energy that would normally be lost during deceleration, which is then intelligently redeployed.

The stored electricity can be used by the starter generator to provide torque assistance to the engine directly, or to power the electric Supercharger to boost performance before the conventional Turbocharger reaches its maximum output, giving seamless throttle response. This system helps improve fuel economy and boosts the vehicle's performance. The combination of MHEV technology, together with other detailed efficiency improvements, lower the CO₂ emissions of the Ingenium inline 6-cylinder engines substantially, when compared to the outgoing engine.

The MHEV technology is standard with the P360 and P400 engines.

- 1 48V ELECTRIC SUPERCHARGER
- 2 TWIN-SCROLL TURBOCHARGER
- 3 48V LITHIUM-ION BATTERY
- 4 BELT-DRIVEN INTEGRATED STARTER GENERATOR
- 5 48V/12V DC-DC CONVERTER
- 6 12V BATTERY

LEGENDARY BREADTH OF CAPABILITY

Range Rover continues to offer outstanding capability on and off-road, with permanent All Wheel Drive (AWD), twin-speed transmission, Adaptive Dynamics and electronic centre differential as standard, whilst Land Rover's revolutionary Terrain Response system means this capability can be harnessed by all drivers: expert and inexperienced alike. This extraordinary capability can be extended to suit individual requirements with a range of additional, optional all terrain technologies.

ELECTRONIC AIR SUSPENSION

A sure-footed, composed drive is completed by the latest Electronic Air Suspension, which provides exceptional wheel articulation and poise. It changes the vehicle's height quickly, allowing cross linking of the diagonal wheels to keep all four wheels on the ground on very uneven surfaces. Added to which, it makes loading heavy objects into the boot easier as you can lower the vehicle's rear suspension height by up to 50mm to suit your needs. These functions can be operated via the 10" Touchscreen, a button in the loadspace area or remotely via the key fob.

Range Rover has a choice of ride height settings to assist the driver and passengers of the vehicle at different stages of their journey or across various terrains - from an access height of 50mm below normal ride height, to an extended height of up to 75mm, with a further extended ride height up to an additional 80mm in more extreme off-road conditions.

The Speed Lowering system uses the Electronic Air Suspension to reduce aerodynamic drag and fuel consumption at cruising speeds by lowering the vehicle by 15mm from normal ride height when the speed reaches 105km/h.

TWIN-SPEED TRANSFER BOX WITH ELECTRONIC CENTRE DIFFERENTIAL

An additional set of lower gears can prove invaluable in challenging conditions such as steep inclines or declines, off-road driving or when towing. The twin-speed transfer box system gives you precise speed and control in such instances. The heart of the twin-speed system is the electronic centre differential that offers a 50:50 torque split between front and rear axles with the ability to pre-emptively lock the axles before slip commences.

TERRAIN RESPONSE

When you manually select Land Rover's unique standard Terrain Response system, it sets the vehicle up optimally to match the demands of the terrain, by adapting the responses of the vehicle's engine, gearbox, differentials and chassis systems. There are seven manual Terrain Response settings: Comfort, Dynamic, Eco, Grass/Gravel/Snow, Mud and Ruts, Sand, and Rock Crawl.

TERRAIN RESPONSE 2

Our unique Terrain Response 2 system is an option designed to monitor driving conditions and automatically optimise driveability and traction by adapting the responses of the vehicle's engine, gearbox, centre differential and chassis systems to match the demands of the terrain. You can manually override the system should you wish.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the online configurator or visit your local Land Rover Retailer.

Vehicle shown: Range Rover Autobiography in Byron Blue with optional features fitted (market dependent).

ADAPTIVE DYNAMICS

Adaptive Dynamics makes the miles go by virtually unnoticed. The system monitors vehicle movements up to 500 times a second, reacting to driver or road inputs almost instantaneously to give greater control and minimise body movement, ensuring a composed, flat ride. The system even senses off-road conditions, and optimises damping accordingly so driver and passengers arrive at their destination refreshed and relaxed.

ACTIVE LOCKING REAR DIFFERENTIAL

The Active Locking Rear Differential ensures the greatest level of traction in all weather conditions both on and off road. Range Rover's permanent All Wheel Drive (AWD) and Electronic Traction Control (ETC), both fitted as standard, distribute torque to both the front and the rear wheels, and by braking the wheels independently to improve traction respectively. The addition of the Active Locking Rear Differential delivers the ultimate combination to maximise traction through limiting slip across the rear wheels.

A second multi-plate wet clutch between the rear wheels can lock almost instantly to provide full engine output torque to both wheels. This can be especially useful to deliver effortless capability in low-grip conditions such as patchy ice, wet grass or during wheel articulation off road. It also provides maximum traction when exiting a corner, as when the inside wheel becomes unloaded due to weight transfer, the Active Locking Rear Differential increases the torque to the outside wheel.

DYNAMIC RESPONSE

Dynamic Response improves vehicle handling through hydraulic roll control, optimising on-road performance and passenger comfort by reducing the amount of body lean during cornering. By controlling the front and rear axles independently, it can deliver increased low-speed agility, along with enhanced high-speed stability and greater steering precision.

1 SAFETY

2 ULTIMATE CAPABILITY

3 COMPOSURE

ALL TERRAIN PROGRESS CONTROL

All Terrain Progress Control (ATPC) is a state-of-the-art optional system that enables you to set and maintain a steady speed in challenging conditions such as slippery surfaces, including mud, wet grass, ice, snow and dirt roads. Operating like a cruise control system, it functions at low speed between 1.8km/h and 30km/h, enabling you to maintain full concentration on steering and finding a path through obstacles.

LOW TRACTION LAUNCH

Providing you with optimum torque control when you move off from a standstill, Low Traction Launch can be activated from the Touchscreen and enhances capability in slippery conditions like wet grass, snow and ice.

HILL DESCENT CONTROL

Land Rover's patented Hill Descent Control (HDC) is a standard feature. It assists the driver with controlled descents of difficult slopes. It does so by maintaining a constant speed and applying braking separately to each wheel.

WADE SENSING

Unique to Land Rover, this optional system uses ultrasonic sensors in the wing mirrors to visually and audibly alert the driver if the water approaches the vehicle's class-leading wading depth of up to 900mm. It does so by providing real-time pictorial information via the Touchscreen about its depth in relation to the vehicle and its maximum wading capability. Only available with 360° Surround Camera.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer
Vehicle shown: Range Rover Autobiography in Byron Blue with optional features fitted (market dependent).

INFOTAINMENT

Delivering a wealth of information and entertainment, every Range Rover is equipped with our InControl infotainment system, Touch Pro Duo. It features intuitive and advanced integrated technologies to ensure everyone can make the most of their journey.

TOUCH PRO DUO

The standard 10" dual high-definition Touchscreens allow the user to view required information whilst simultaneously being able to interact with additional features, for increased flexibility and efficiency of use. For instance, you can use the navigation system in the upper screen whilst adjusting multimedia settings on the lower. Direct access to cabin and seat temperature controls are also available via the multi-function Dynamic Dials. For a truly elegant and streamlined appearance, the steering wheel also has hidden-until-lit, touch-sensitive switches as standard. One of these switches is programmable, so that it can be personalised to your preferences to accomplish a host of functions.

INTERACTIVE DRIVER DISPLAY

The 12.3" high-definition Interactive Driver Display can receive and project a vast amount of driving information, entertainment and active safety data including navigation, phone and media. Its high resolution ensures the utmost clarity and its refined processing engine delivers smooth-moving, pin-sharp graphics. Features can be accessed on either the Interactive Driver Display or the Touch Pro Duo Touchscreens.

HEAD-UP DISPLAY

Without distraction or the need for you to take your eyes off the road, Head-up Display* is an option that presents key vehicle data such as your speed, gear position and navigation directions on the windscreen. It features crystal-clear full-colour graphics in high resolution, enabling you to see all driver inputs and information with ease, including phone/call status. The feature can be turned on and off dependent on driver preference.

REAR SEAT ENTERTAINMENT

The optional Rear Seat Entertainment system provides two 10" high-definition seat mounted articulating Touchscreens. It includes 'Journey Status', a navigation summary screen which displays a pop-up for the rear occupant detailing the time and distance to destination. The system comes with a pair of WhiteFire® digital wireless headphones and HDMI, Mobile High-definition Link (MHL) and USB connections. Passengers can also enjoy their favourite TV shows via the optional Digital TV feature.

*For optimal performance, solar attenuating glass may be required. Please consult your Land Rover Retailer for further information.

WhiteFire® is a registered trademark of Unwired Technology LLC., and any use of such marks by Land Rover is under licence.

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

CONNECTIVITY

InControl is Land Rover's suite of standard and optional features that connects you to your vehicle and links you seamlessly, and securely, with the outside world. With a selection of apps, even when you're away from your vehicle some of the InControl features stay with you, making sure the Land Rover experience is more enjoyable than ever.

VOICE RECOGNITION SYSTEM

So you can complete tasks without taking your eyes off the road, Range Rover offers intelligent voice recognition. For example: 'tune to 97.9' or 'call home'.

NAVIGATION PRO¹

Navigation Pro allows you to save your favourite places, use pinch-and-zoom gestures for simple map exploration and can display a choice of either 2D or 3D crystal-clear map graphics. Navigation Pro functionality is further enhanced by the Connect Pro Pack.

CONNECT PRO¹

Connect Pro consists of Remote Premium and Pro Services with 4G Wi-Fi Hotspot, and is designed to enhance your in-car and out-of-car experience, ensuring you and your passengers enjoy the journey whilst remaining connected to the world.

Pro Services² include:

- **Real-time Traffic Information** - Uses live traffic data feeds to give you the most accurate picture of what the traffic is like on the way to your destination.
- **Online Search** - Wherever you are, you can search the surrounding area for places of interest. The system can access expert destination information, travel tips and inspiration as well as online travel reviews of the local area.
- **Planning Routes and Door-to-Door Routing** - Before setting off, use the optional Route Planner app or go online to search, save locations or set your destination. The app uses the Cloud to send your destination automatically to your vehicle's navigation screen. Once you've parked, the Route Planner app will guide you to your destination - a true door-to-door experience which includes public transport options.
- **Share ETA** - You can share your estimated time of arrival so your selected contact(s) will know exactly when you will arrive, as calculated by the navigation guidance system. If you're running late, Share ETA can then send automatic updates via text messages or email, without any further action from you.

¹Market dependent. ²Features within Pro Services may vary between markets. Please contact your local Land Rover Retailer for more information.

As we roll out InControl, specific features described may be optional and market or powertrain dependent. Please consult your local Land Rover Retailer for availability and full terms in your country. Certain features require an appropriate SIM with a suitable data contract, which will require a further subscription after the initial term advised by your Retailer. Mobile connectivity cannot be guaranteed in all locations.

- **Satellite View** - When you want to get the context of your surroundings from overhead, simply switch to satellite view.
- **Commuter Mode** - Allows the system to learn your commutes and automatically advises you of the expected journey time based on live and historical traffic movements without you having to input a destination. The system learns the routes you take for a given destination and then advises which of those is the quickest. The feature can be turned on and off dependent on driver preference.
- **Online Routing** - While you're on your way to a destination the system monitors live traffic conditions and takes into account typical traffic patterns for that time of day, keeping you on the optimum route.

SMARTPHONE PACK¹

By screen sharing with Range Rover's InControl infotainment system, the Smartphone Pack helps you stay safely connected to your smartphone even while in the car.

Application include:

- **Apple CarPlay[®]** - Designed for increased safety, enabling the use of apps while allowing the driver to concentrate on the road ahead. Connect your Apple smartphone to your car to use compatible apps such as maps, messages and music through the Touchscreen.

AUDIO

A vehicle's cabin is the ideal place within which to experience your personal choice of music, and Range Rover has the option of three different audio systems to bring your music to life:

MERIDIAN™ SOUND SYSTEM

Great definition, crystal-clear highs and full, deep bass - delivered through the careful arrangement of 13 speakers including a dual-channel subwoofer.

MERIDIAN SURROUND SOUND SYSTEM

All the fullness and clarity of a live performance delivered through an arrangement of 19 speakers including a dual-channel subwoofer - seamlessly brought together using Trifield™ technology. Exclusive to Meridian, Trifield perfectly blends the centre and surround channels with the left and right, ensuring an optimum, consistent sound experience for each passenger.

MERIDIAN SIGNATURE SOUND SYSTEM

This delivers truly life-like reproduction, creating a profound, personal sound experience for every seat. World-first Trifield 3D technology takes surround sound to the next level - the Signature Sound System features 29 speakers including a dual-channel subwoofer. Incredibly authentic, the sense of cabin space is expanded to a 3D experience - rendering all the instruments, performers and venues of your favourite performances in true scale and location.

■ Standard □ Optional - Not Available.

Features and their availability may differ by vehicle specification and market. For full feature and option availability please refer to the accompanying Specification and Price Guide or visit your local Land Rover Retailer.

MERIDIAN™

Formed in 1977 in Cambridgeshire, England, Land Rover’s audio partner Meridian has pioneered many firsts, including active speakers and the world’s first digital surround sound processor.

Meridian’s audio technology input has helped ensure that Range Rover is the most superb space within which to experience sound. Meridian Cabin Correction technology was utilised to analyse cabin shape, acoustics and resonance characteristics in order to help remove unwanted sounds.

The advanced algorithm ensures that the rhythm, punch and timing of any piece of music are heard precisely how the artist intended, providing a consistently exceptional quality audio experience for all passengers in the vehicle.

DIGITAL SIGNAL PROCESSING

Brings all elements of the audio system together as one, for performance that would otherwise require significantly larger speakers.

MERIDIAN CABIN CORRECTION

The advanced algorithm of Meridian’s Cabin Correction tailors the sound experience to the precise acoustics of Range Rover’s interior.

MERIDIAN DIGITAL DITHER SHAPING

To maintain the quality of musical recordings, they are converted into a common digital format. Meridian Digital Dither Shaping ensures that digital signal conversions are made smoothly and seamlessly, preserving the finest details of the audio performance. The result is authentic musical conversion, evoking the emotions of the original recording.

TRIFIELD™

Exclusive to Meridian, Trifield blends the centre and surround channels seamlessly with the left and right, delivering a consistent, concert-like experience for all occupants.

TRIFIELD 3D

Building on Meridian’s proven Trifield surround sound technology, world-first in-car Trifield 3D truly brings musical performances to life. Through the addition of dedicated height channels, the sense of cabin space is expanded to a 3D experience, for a supreme sense of scale and definition to your music.

DRIVER ASSISTANCE

MAKING DRIVING EASIER

From negotiating city traffic or the motorway, to providing additional safety for you and your passengers, there's a wealth of innovative technologies available: either as standard, optional or as part of an optional pack. Whichever you choose, you'll find every single feature has been designed and engineered to heighten your enjoyment of the vehicle.

STANDARD DRIVE FEATURES

Lane Departure Warning

- **Cruise Control and Speed Limiter** allows the driver to maintain the current speed of the vehicle without the need for continued use of the accelerator pedal, helping to reduce driver fatigue. The Speed Limiter will also allow the driver to preset a maximum specified speed that the vehicle will not exceed. Both functions can be easily turned on or off by the driver as desired.
- **Lane Departure Warning** can help make long journeys much safer. The system senses when your vehicle is unintentionally drifting out of your lane, and notifies you with a visual alert and a gentle vibration of the steering wheel.

OPTIONAL DRIVE PACKS

DRIVE PACK

Blind Spot Monitor

The optional Drive Pack offers a range of features that help keep you safe and informed. The Drive Pack includes:

- **Driver Condition Monitor** detects if you're starting to feel drowsy and gives you an early warning when you need to take a break.
- **Blind Spot Monitor** alerts you to vehicles in, or quickly approaching, your blind spot. When a vehicle is detected, a small warning light will illuminate in the corresponding wing mirror. If you indicate in the direction of the obstacle, the warning light will flash to highlight potential danger.

DRIVE PRO PACK

Lane Keep Assist

For an even more relaxed drive, the optional Drive Pro Pack contains a wide range of driver assistance features including the Driver Condition Monitor in the Drive Pack, plus:

- **Lane Keep Assist** detects when your vehicle is unintentionally drifting out of your lane, and gently steers you back.
- **Blind Spot Assist** can help prevent collisions. If your vehicle detects another car in your blind spot when you begin to change lanes, this system illuminates a warning light by the door handle and provides precisely calculated steering torque, guiding your vehicle safely away from the approaching vehicle.
- **High-speed Emergency Braking** detects when a potential frontal collision with another vehicle may occur and displays a forward alert to warn the driver to brake. If the driver doesn't react, the vehicle will deploy the brakes in order to reduce the severity of the possible impact. High-speed Emergency Braking is ready and active from 10km/h to 160km/h.

ENJOY STRESS-FREE PARKING

Range Rover offers the most advanced technologies to deliver intuitive and easy parking solutions. Whether reversing, parallel parking or getting into or out of tight spaces, these features make life easier. Available as standard, optional or as part of an optional pack.

STANDARD PARK FEATURES

Front and Rear Parking Aid

- **Front and Rear Parking Aid** helps make manoeuvring even easier. When you select Reverse, or choose to activate them manually, sensors located in the front and rear bumpers are triggered. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles.
- **Rear Camera** provides improved visibility when reversing. Static lines representing the vehicle's outer perimeter and predicted path are superimposed on the rearward image, to make parking in tight spots as easy as possible. This valuable parking aid also helps when hitching a trailer.

OPTIONAL PARK FEATURES

360° Surround Camera

- **360° Surround Camera** uses our digital cameras discretely placed around the vehicle, providing a 360° overhead view on the Touchscreen. With the capacity to display several different views at the same time, this helps with various manoeuvres from parking by a kerb, to getting in and out of tight spaces and junctions.

OPTIONAL PARK PACKS

PARK PACK

360° Parking Aid

The optional Park Pack assists you with manoeuvring in tight spaces and in urban environments, it features:

- **360° Parking Aid** gives you complete confidence when manoeuvring in tight spaces. Sensors located around the vehicle are automatically triggered when Reverse is selected, or can be manually activated, with a graphic appearing on the Touchscreen showing an overhead view of the vehicle. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles.
- **Rear Traffic Monitor** is particularly useful when reversing out of a parking bay. The system warns you of vehicles, pedestrians or other hazards approaching from either side of your vehicle. It will alert you with both audio and visual warnings so you know what's behind you even when the view is obstructed.
- **Clear Exit Monitor** alerts rear passengers to any approaching cars, cyclists or other hazards before they leave the vehicle. As the rear seat passenger pulls the door handle to leave your vehicle, a warning light will flash on the rear door if an incoming obstacle is detected.

PARK PRO PACK

Park Assist

The optional Park Pro Pack enables you to park and manoeuvre safely and securely in and out of tight spaces and into traffic that is obscured by buildings or other vehicles. It includes the 360° Parking Aid, Rear Traffic Monitor and Clear Exit Monitor in the Park Pack, plus:

- **Park Assist** makes parallel and perpendicular parking easier than ever by steering your vehicle into a suitable space. You just have to select the appropriate gear and control the vehicle's speed with the brake and accelerator pedals. Graphics and notifications guide you through the manoeuvres. Park Assist will also steer you out of a space, taking all of the stress out of parking.

DRIVER ASSIST PACK

The optional Driver Assist Pack offers a wide range of driver aids including the features found in the Drive Pro Pack (see page 37), the Park Pro Pack (see page 39) and the 360° Surround Camera. It also includes Adaptive Cruise Control with Steering Assist. Moderate steering interventions ensure that the physical effort of maintaining a central vehicle position is reduced.

FRONT CAMERA

FRONT RADAR

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

Vehicle shown: Range Rover Autobiography in Byron Blue with Navy/Ivory interior with optional features fitted (market dependent).

ADAPTIVE CRUISE CONTROL WITH STEERING ASSIST

Adaptive Cruise Control with Steering Assist can be activated from 15km/h and once activated will operate between 0-180km/h. It begins functioning when you depress the 'Set' cruise button. A camera and radar then work together to track lanes ahead to maintain a central position for your vehicle, and moderate its speed according to the behaviour of the traffic ahead of you. If the vehicle ahead slows, even to a standstill, the feature automatically slows your vehicle, bringing it to a stop where necessary, to maintain a relaxed and composed drive in busy traffic situations.

Adaptive Cruise Control with Steering Assist works with you: as you keep your hands on the wheel anticipating the road ahead, the system assists with steering, braking and acceleration. Should you remove your hands from the wheel, the vehicle will provide a warning. If the warning is not heeded then the Steering Assist is deactivated but the Adaptive Cruise Control remains active.

EFFICIENT TECHNOLOGIES

SUSTAINABLE BY DESIGN

Land Rover are committed to producing vehicles that use more sustainable materials, produce less waste and use fewer natural resources as part of our approach to sustainable business. Range Rover's development process has included a full life-cycle assessment and has been designed to be 85 percent recyclable/reusable and 95 percent recoverable at the end of the vehicle's life.

Our innovative design enables the use of a unique alloy in the vehicle body, made from up to 50 percent recycled aluminium derived from our closed-loop manufacturing process, retaining quality and performance but delivering lower life-cycle CO₂ emissions. Closed-loop manufacturing means taking the scrap from the body pressings process, segregating it and re-melting it back into quality sheet aluminium at our supplier, to be used again to press out body panels, thereby reducing the need to use primary aluminium.

ENGINE MANUFACTURING CENTRE

Jaguar Land Rover's Engine Manufacturing Centre, where our Ingenium engines are assembled, has been built to the highest environmental standard (BREEAM Excellent) and features one of the largest rooftop solar panel installations in the UK. Comprising of no fewer than 22,600 individual panels with 6.2MW generating capacity, the panels have the capability to provide up to 30 percent of the site's energy needs.

SMART REGENERATIVE CHARGING

Smart regenerative charging prioritises the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and reduce fuel consumption.

LOW CO₂ TECHNOLOGIES

Range Rover powertrains incorporate a variety of low CO₂ technologies. Our intelligent Stop/Start system is designed to improve fuel efficiency and reduce emissions. Mild Hybrid Electric Vehicle (MHEV) - considered the next generation of Stop/Start technology* - takes this even further. The combined effect of both systems gives a 15 percent reduction in CO₂ emissions. Our latest Plug-in Hybrid Electric Vehicle (PHEV)* ensures both optimum performance and efficiency.

*Market dependent.

Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy. Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels.

SAFETY

SAFE AND SECURE

With its sophisticated design cues and use of materials, Range Rover provides a high degree of protection. Its all-aluminium monocoque body makes it one of the strongest vehicles of its kind. The inclusion of high-strength aluminium in the body structure ensures minimum intrusion into the safety cell in the event of a collision, while the elevated Command Driving Position provides enhanced visibility in all conditions. You can see more of the road and be easily seen by other road users, providing an enhanced feeling of safety and confidence.

It has also been engineered to include a wealth of standard features not only to protect you and your passengers, but to actively help prevent accidents occurring:

Dynamic Stability Control (DSC) monitors Range Rover's dynamic behaviour, intervening to maximise vehicle stability. DSC reduces engine torque and applies braking to the appropriate wheels to correct the vehicle's direction of travel by counteracting understeer or oversteer.

Anti-lock Braking System (ABS) allows the vehicle to maintain traction with the road surface whilst braking and prevents wheels from locking - thereby retaining the vehicle's ability to steer. The system helps to shorten the braking distance.

Electronic Brake-force Distribution (EBD) automatically varies the braking force to each axle in order to minimise stopping distance, while still maintaining stability and the vehicle's ability to steer.

Electronic Traction Control (ETC) optimises traction and stability by controlling wheel spin. The ETC system reduces torque to the spinning wheel, then applies braking to the wheel, if required.

Cornering Brake Control (CBC) automatically varies the braking force to each wheel when the vehicle's brakes are applied around a corner and the limit of grip is reached. The system will prevent the vehicle's wheels from locking up and skidding in this event through varying the braking force applied to each wheel.

Roll Stability Control (RSC) is integrated with DSC to reduce the possibility of rollover, while providing agility and ability to steer around obstacles. It monitors the vehicle motion and cornering forces to detect any potential risk of rollover. When risk is detected, braking is applied to the outside front wheel to reduce forces which contribute to rollover.

Emergency Brake Assist understands when you apply the brakes quickly but without the necessary force to maximise stopping performance. It therefore boosts the brake pressure through the ABS pump to ensure you stop in time.

Hazard Lights Under Braking - To help reduce the risk of a collision, the Emergency Stop Signal system automatically activates the hazard warning lights during emergency braking.

To improve safety further for all the family, two ISOFIX points for baby/child seat restraints are fitted on each side of the rear seats and additional protection is offered by seat belt pretensioners which, in the event of a front impact, reduce forward movement. To further protect you, there is a comprehensive system of airbags including driver and passenger airbags, side curtain and thorax.

LIGHTING TECHNOLOGY

Range Rover features all-round exterior LED lighting with standard features including signature Daytime Running Lights, automatic headlights and power wash. LED lights are designed to last the lifetime of the vehicle and are more energy efficient. Also, the quality of light produced is closer to daylight conditions, so driving at night becomes less tiring.

A range of beam pattern assistance features provide maximum light while minimising the impact on other road users. The standard Premium LED headlights can be enhanced by the optional Auto High Beam Assist which turns on the main beam and dips it when other road users are detected.

Optional Matrix LED headlights and Pixel LED headlights both feature an Adaptive Front-lighting System (AFS) and also enable Advanced Driving Beam (ADB). The AFS optimises the lighting beam to suit a range of driving conditions: town, country, motorway and bad weather, while the ADB allows you to use both the high and low beam concurrently. By splitting the main beam into vertical strips, the Matrix LED headlights can cast four vertical shadows in front of a vehicle ahead to prevent dazzling without having to dip the main beam and lose the illumination.

Optional Pixel LED headlights, with nearly three times as many LEDs than the Matrix headlights, offer our most advanced headlight technology and build on the ADB capability to ensure maximum light. By splitting the main beam pattern vertically and horizontally, they enable up to four higher definition shadows to avoid dazzling multiple vehicles ahead. This headlight option incorporates bending lights which operate at higher speeds to direct the main beam pattern according to the direction of steering.

Optional Pixel-laser LED headlights build on the Pixel LED headlight option with the addition of laser technology. The long range laser delivers five times higher luminance than standard LED lights and is particularly useful for long straight road driving. They become operational above 80km/h and when no other external lights are detected, to produce clear sight for over half a kilometre.

AUTOMATIC ACCESS HEIGHT 50MM

VERSATILITY

TRULY FLEXIBLE

ELEGANT ARRIVAL

There's a raft of features to make every journey even more comfortable and enjoyable than ever. **Automatic Access Height** allows you to get in and out of the vehicle with greater ease and elegance as, when activated, this feature lowers the vehicle by as much as 50mm. Prior to leaving the vehicle, optional **Clear Exit Monitor**¹ provides an alert to rear seat passengers to prevent them opening the door onto approaching obstacles. The vehicle is also available with optional **soft door close** to provide power latching on the front and rear doors.

INTERIOR CLIMATE

To prevent the cabin from overheating in the sun and minimise demands on the air conditioning, the **auto sunblind**² closes automatically when passengers have disembarked and the doors locked. When the vehicle is re-opened the sunblind returns to the position prior to it auto-closing. The optional **Cabin Air Ionisation** with **Nanoe™** technology improves the air quality within the vehicle cabin and reduces allergens, viruses, airborne bacteria and associated odours. It does so by ionising particles in the air, making them attract to surfaces and thus helping to cleanse the air. And optional **Four-zone Climate Control** can also make life more comfortable by adjusting temperature levels, direction and intensity of airflow.

¹Market dependent. ²Only available with a panoramic roof.

Nanoe™ is a trademark of Panasonic Corporation.

Vehicle shown: Range Rover Autobiography in Byron Blue with optional features fitted (market dependent).

ACTIVITY KEY

With the optional **Activity Key** you can enjoy your favourite activities and keep your vehicle key securely in the vehicle. For extra convenience, you can strap the Activity Key to your wrist. The wristband is robust and fully waterproof, allowing you to take part in a range of activities from horse riding to swimming. Simply touch your Activity Key on the tailgate (behind the letter R in the Range Rover script) to lock or unlock the car and deactivate or reactivate the conventional key fob.

TAILGATE

The split tailgate is distinctly Range Rover. Its electrically operated upper and lower tailgates help provide a platform for social and sporting events, coupled with greater protection from the elements. **Powered gesture tailgate** allows you to open and close the tailgate from the kerb without needing to touch either the vehicle or the key fob. And as the system is compatible with optional towing solutions, you can still tackle demanding situations with the least amount of fuss. Access to the loadspace is enhanced with **Rear Height Adjust** which lowers the rear suspension by up to 50mm when the tailgate is opened. This creates a more natural ramp angle for ease of loading.

INTELLIGENT SEAT CARGO MODE/CONVENIENCE FOLD

Intelligent Seat Cargo Mode - enabling the power fold of the rear seats, whilst moving the front seats forward and preventing obstruction - is fitted with all 60:40 bench seats with power recline and load through (ideal for long items such as skis).

Convenience Fold, available with the optional rear Executive Class seats only, allows you to configure the rear seats via the upper Touchscreen which can be truly useful when you're returning with a clutch of shopping bags or an awkward load.

REAR EXECUTIVE CLASS SEATING

POWER AND STOWAGE

With optional two domestic power sockets, up to five 12V sockets and up to seven **USB ports** located throughout the cabin, multiple electronic devices can be charged on the go. And to ensure your cabin is clutter-free, there is increased stowage space including a recess specifically for smartphones in the front centre console compartment. In addition to the optional front centre cooler compartment, a front centre refrigerator compartment can be specified as an alternative, to provide the luxury of cooling drinks on demand. It can accommodate up to four 500ml bottles and maintain them at a temperature of 5°C, with the ability to perform a rapid cool to quickly chill your drink.

TOWING

With a towing capacity of up to 3,500kg and by incorporating tailored technologies, Range Rover can handle the most demanding of tasks.

ELECTRICALLY DEPLOYABLE TOW BAR

This optional system is deployed using a convenient button in the loadspace compartment, or via the Touchscreen.

TOW HITCH ASSIST

Tow Hitch Assist makes coupling a trailer to the vehicle much easier by helping you visualise the hitching process: it displays the predicted path of the vehicle tow ball towards the trailer tow bar on the Touchscreen. Standard with Rear Camera.

REAR HEIGHT ADJUST

Rear Height Adjust allows the use of switches in the loadspace or on the key fob to lower the rear suspension height by up to 50mm - useful when loading or unloading cumbersome items, or when hitching, unhitching or loading a trailer.

TOW ASSIST

Tow Assist helps with reversing by predicting the trailer's direction. The system displays the predicted path of both the vehicle and the trailer as coloured trajectory lines on the Touchscreen. For precise guidelines you can even choose your trailer's width. Standard with 360° Surround Camera.

ADVANCED TOW ASSIST

Advanced Tow Assist allows you to control the direction of your trailer when reversing by using the rotary Terrain Response 2 controller. The optional system will control the vehicle's steering to achieve the desired trailer trajectory.

TRAILER STABILITY ASSIST

Trailer Stability Assist (TSA) gives you greater stability when towing. Should TSA detect a dangerous trailer sway situation is developing, it can help you regain control by gradually reducing Range Rover's speed through lowering engine power and applying the brakes individually on each side of the vehicle to control the sway.

SPECIAL VEHICLE OPERATIONS

SVAUTOBIOGRAPHY DYNAMIC

EXTERIOR

Designed and engineered by Special Vehicle Operations (SVO) – Land Rover’s centre of excellence for bespoke commissions, luxury editions and performance models – the SVAutobiography Dynamic offers the pinnacle in performance and luxury.

Designed for luxury performance, the flowing lines and contemporary design of SVAutobiography Dynamic will turn heads all over the world. With a tuned chassis, steering, exhaust and suspension, the SVAutobiography Dynamic sits 8mm lower than a standard Range Rover – its aggressive stance hinting at the power and performance contained within. Unique Graphite Atlas accents, distinctive Red Land Rover branded brake calipers and exclusive wheels add to the performance appeal of the vehicle. The SVAutobiography Dynamic provides a new level of agility and performance for the driver to enjoy.

INTERIOR

Encapsulating luxurious comfort and style, the interior of SVAutobiography Dynamic epitomises the very best in sublime craftsmanship. Alluring to the touch, only the very finest Diamond Quilted leathers feature within the cabin. A Knurled finish to interior features, including the Stop/Start button, rotary and foot pedals, add to the sense of refinement. The Steel Weave Carbon Fibre finishers reflect SVAutobiography Dynamic's distinctive personality.

Interior shown: Range Rover SVAutobiography Dynamic in Ebony/Vintage Tan with Ebony/Vintage Tan seats and Steel Weave Carbon Fibre finisher with optional features fitted (market dependent).

Actual seats have new cushions and interlayers with softer, looser leather to optimise these features. Please refer to your Land Rover Retailer for more information.

SVAUTOBIOGRAPHY LONG WHEELBASE

EXTERIOR

Craftsmanship never goes out of style, and over 45 years of expertise in designing Range Rover is manifested in each SVAutobiography Long Wheelbase. Every tailored aspect whispers elegance and attention to detail. Approaching the front, each vehicle is crafted with luxury design cues such as the unique front grille and 'Range Rover' front and rear script with a dark knurled-effect finish edged in Bright Chrome.

The SVAutobiography Long Wheelbase retains a poised stance, even with the 200mm extra length. Body-coloured side vent graphics are punctuated by Bright Chrome inserts, with Bright Chrome door handle surrounds and tailgate finisher. Unique 21" and 22" wheel choices complete the luxury design.

To reflect your personal taste, the option of exterior Duo Tone paint allows customers to specify the vehicle in one of eight exterior colours* below the waistline, with a Santorini Black, Aruba or Eiger Grey finish above the waistline to produce a prestigious appearance.

*Duo Tone paint available on SVAutobiography Long Wheelbase. Please see page 78 for Duo Tone combinations.
Vehicle shown right: Range Rover SVAutobiography Long Wheelbase with Duo Tone paint in Eiger Grey and Santorini Black with optional features fitted (market dependent).

INTERIOR

Having operated the power close rear doors from fully open at the touch of a button, the interior of SVAutobiography Long Wheelbase is revealed as the epitome of refined, sophisticated and indulgent living. Attention to the minutiae is in everything you see and touch. From the rear centre console's power deployable tables to the exclusive Diamond Quilted leather seats and rear seat refrigerated compartment, the vehicle exudes confidence and a calm, collected air.

A Knurled finish to interior features such as the Stop/Start button, Zenith clock, rotary shifter and armrest adjusters, all add to the refined look. The leather-wrapped sides of the parcel shelf and loadspace, and Executive Class Comfort Plus seats come as standard. This ensures every journey is a truly relaxing experience.

Optional features include a power deployable loadspace floor in veneer or carpet finish to enhance this area of the vehicle and a tailgate event seating system. This provides two comfortable luxury leather seats which mount in the tailgate when the vehicle is stationary for participating in outdoor events.

SPECIFICATIONS

CHOOSE YOUR MODEL

Each model has a choice of engines and distinctive features. This guide will help you to select your ideal Range Rover. On the following pages you'll see the standard features for each model.

CHOOSE YOUR ENGINE

WHICH ENGINE IS RIGHT FOR YOU?

Lots of people struggle with this. But the truth is that it really depends on what your priorities are and the type of driving you do. Diesel engines are more powerful than petrol engines. They have a higher torque and so give a smoother drive. And they're more fuel-efficient than petrol, particularly out of town on long journeys. On the other hand, the harshness, noise, and vibrations in diesel-driven cars are higher than that of a petrol-driven car. Also, the maintenance cost of diesel cars is greater. Petrol cars are generally quieter and cheaper to run on shorter journeys. Plug-in Hybrid Electric Vehicles (PHEV), meanwhile, provide all-electric performance at lower speeds and traditional combustion performance on longer journeys.

DIESEL ENGINES

TDV6

The 3.0 litre V6 Turbocharged Diesel engine produces 258PS and 600Nm of torque and is ideal for higher power and torque demand usage with exceptional driveability.

- The innovative parallel sequential twin turbochargers - a concept pioneered by Jaguar Land Rover - features a ceramic ball bearing on the primary turbo to reduce friction for maximum throttle response.
- A switchable coolant pump and two-stage oil pump are used for optimal thermal energy management, improving operating efficiency.
- The piezo common rail fuel injection system enables precise control of the amount of fuel injected, creating a uniform mixture for more efficient combustion and less emissions.
- The engine utilises these technologies to offer premium refinement and performance.

SDV8

The 4.4 litre V8 Twin Turbocharged Diesel offers top-of-the-range performance, with 339PS and a staggering 740Nm of torque between 1,750-2,250rpm.

- Helical and tangential inlet ports for low-speed swirl and high gas flow, with combustion chambers optimised for emissions performance.
- 2000 bar common rail fuel injection with Gen 3 Piezo injectors.
- Compounded Graphite Iron Block with optimised thin wall section and aluminium alloy heads.
- Twin overhead camshafts and four valves per cylinder.

*Market dependent.

Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy. Note that CO₂ and fuel economy figures can vary according to wheel fitment, and the lowest figures may not be achievable with the standard wheels.

PETROL ENGINES

P360/P400*

The 3.0 litre Ingenium inline 6-cylinder Petrol engine produces 360/400PS and 495/550 Nm of torque.

The combination of MHEV technology and a range of efficiency measures deliver an engine of superb performance and driveability.

- Mild Hybrid Electric Vehicle (MHEV) technology utilises a belt-driven integrated starter generator, a 48V Lithium-ion battery and an electric supercharger for driveability and refined Stop/Start operation.
- The twin-scroll turbocharger, in addition to the electric supercharger, delivers additional engine boost at higher engine speeds and seamless power delivery.
- Variable cam timing on both the intake and exhaust camshafts allows the nominal cam profile to be advanced or slowed for optimum combustion. Combined with Continuous Variable Valve Lift, this delivers class-leading levels of flexibility and control over engine breathing to optimise efficiency at every operating condition, enhancing performance and fuel economy.

V8 SUPERCHARGED PETROL

With 525PS and 625Nm of torque the 5.0 litre V8 Supercharged Petrol engine provides top-of-the-range performance for ultimate refinement and driver engagement.

- The V8 has a compact and lightweight all-aluminium design, with impressively low levels of internal friction.
- The engine has been optimised around a state-of-the-art engine management system. This features high pressure direct injection with a centrally mounted, multi-hole, spray-guided injection system.
- Fitted with a sixth generation, Twin Vortex System (TVS) supercharger, the engine offers superior thermodynamic efficiency and extremely refined noise levels. The supercharger fully utilises the additional capacity of the 5.0 litre engine, generating a torque profile that delivers outstanding levels of power in a linear and engaging manner.
- The result is an impressively powerful yet refined drivetrain that delivers on both sporting excitement and luxurious refinement whenever required.

V8 SUPERCHARGED 565PS

Exclusive to SVAutobiography Dynamic and SVAutobiography Long Wheelbase, the 5.0 litre V8 Supercharged Petrol engine has been updated to deliver 565PS and 700Nm of torque. This is enabled by a recalibration of the engine and its management system to increase maximum available boost pressure. Maximum torque is delivered at 6,000-6,500rpm. Refer to V8 Supercharged Petrol engine for full details.

CHOOSE YOUR EXTERIOR

SELECT YOUR ROOF

Choose from a metal roof or a fixed panoramic or sliding panoramic roof - all of which enhance the sense of space in the vehicle's interior and flood it with natural light. The fixed panoramic roof provides uninterrupted views of the surrounding environment. The sliding panoramic roof opens fully to let the outside in. You can select either a body-coloured or contrast roof in Narvik Black to further enhance your vehicle's exterior. Metal and panoramic roofs available with all colour finishes.

BENCH SEAT

SELECT YOUR SEAT CONFIGURATION

Bench Seat

Arrive in style. The leather seating in Range Rover is both truly comfortable and effortlessly versatile. The 60:40 configuration with load through facility is available with both a manual recline on HSE, or a powered recline on Vogue, Vogue SE and Autobiography. All bench seats include Passenger Seat Away.

The powered recline variant also provides Intelligent Seat Fold, offering the ability to fold and configure your seats from the loadspace. Seat comfort is heightened with the addition of heated and cooled¹ variants.

Rear Executive Class Seat

The ultimate in luxury, these seats provide exemplary levels of comfort. Featuring wider and deeper cushioning, the power deployable centre console integrates seamlessly with the two outer passenger seats, creating a luxury four-seat environment. If more versatility is required, simply retract the power deployable centre console to reveal a centre seat for a third occupant. Or for the first time, fold your rear Executive Class seats forward to maximise your loadspace. Featuring Extreme Passenger Seat Away and powered recline as standard, optional Comfort and Comfort Plus features including 'hot stone' massage and heated calf rests² create a truly luxurious environment. Available on Vogue SE, Autobiography, SVAutobiography Dynamic and SVAutobiography LWB.

DESIGN

SVO Design Pack²

SVO design packs provide a purposeful, dynamic and stunning styling enhancement that allow customers to add their own stamp of individuality by tailoring their Range Rover. Exterior features include a unique front bumper with integrated tailpipes, side vents, grille and side sill claddings.

Noble Chrome Mirror Covers

Noble Chrome plated mirror covers designed to enhance the Range Rover's exterior styling cues. This neat styling upgrade complements various Dark Atlas, Light Atlas and Bright finish exterior trim.

Sport Pedal Kit

Alternative pedal covers for an interior styling enhancement featuring a Bright finish. Manufactured from Polished and Etched Stainless Steel and features hidden fixings for a clean finish.

Illuminated treadplates

Illuminated treadplates with Range Rover lettering and halo surround. Rear treadplates feature illuminated halo only.

Personalised illuminated treadplates

Personalised illuminated treadplates allow you to choose a personalised message using an approved set of fonts/typefaces which will be highlighted in white illumination when the front doors are open.

Gearshift paddles

Complete the look and feel of your steering wheel with premium aluminium paddles. Gearshift paddles are machine polished, anodised and hand brushed to provide exceptional wear resistance with a premium finish.

SVO Design Pack

LIFESTYLE

Deployable side steps

These smart, practical steps make it easier to get in and out of the vehicle. Neatly stowed under the sills, the side steps automatically deploy as soon as the door is opened, or when activated by the key fob. They stow automatically when the door is closed. The side steps are sensitive to obstructions and will not deploy in off-road or low-range settings. Automatic Mode can be overridden to allow access to the roof when the doors are closed. The deployable side steps are compatible with front mudflaps and feature a stainless steel finish with laser etched Range Rover branding.

Fixed side steps

Complete with a rubber tread mat and Brushed Stainless Steel trim, the fixed side steps provide easy access/exit to the vehicle's cabin and aid access to the roof. With embossed Range Rover branding, exterior Bright work and Bright anodised aluminium edge trim finish, they complement the vehicle's exterior styling cues.

Rubber mats

Rubber footwell mats for front and second row occupants help provide protection from general dirt. Featuring Bright accent Range Rover ingot and durable metal corner pieces.

Click and Go System

The Click and Go range is a multi-purpose seat-back system for second row passengers. The versatile Click and Go Base fixes between the headrest mountings and further attachments can be added to hold tablets, bags and shirts or jackets. Each attachment is sold separately. The base can be easily removed when not in use.

Deployable side steps

²Offered for SWB only. Only applicable for vehicles fitted with fog lamps only. Not available for Plug-in Hybrid Electric Vehicles. Mudflaps, front and rear, not available with SVO Design Pack.

SPORTING

Tow Bar Mounted Bike Carrier

The tow bar mounted bike carrier features a one hand, quick attach/release tow bar coupling mechanism and can be tilted away from the vehicle, by use of a foot pedal, to allow easy access into the rear tailgate. The tailgate can be opened with carrier in deployed/folded position. Manufactured from aluminium and other lightweight materials, the bike carrier also features a rear lighting and licence plate mount and it is lockable for security. The carrier has a folding/sliding mechanism to allow ease of stowage when not in use. A holder and ratchet function ensure bicycles are safely secured. Maximum load capacity 40kg for two bikes and 51kg for three bikes.

Sports roof box*

Sleek, aerodynamic design sports roof box with a Gloss Black finish which can be mounted on either side of the vehicle for kerbside opening. Internal retention system for skis or other long loads. Lockable for security.

Roof Mounted Bike Carrier*

Roof Mounted, lockable Bike Carrier designed for holding a single bike, up to 20kg.

Aqua Sports Carrier*

Carries a sailboard, canoe or kayak. Includes lockable multi-purpose holder to carry oars or paddles. Tilts to facilitate easy loading/unloading. Features lockable straps and rubber supports to maintain optimum weight distribution whilst protecting the kayak and vehicle from scratches/scuffs. Maximum load capacity 45kg.

Ski/Snowboard Carrier*

Carries four pairs of skis or two snowboards and incorporates slider rails for easy loading; is also lockable for security. Maximum payload 36kg.

Tow Bar Mounted Bike Carrier

Aqua Sports Carrier

OUTDOOR

Tailgate Event Seating in Ebony leather

The Tailgate Event Seating is handcrafted from beautiful Ebony Windsor leather with a highly durable aluminium frame. Stowed in the loadspace, these seats can be quickly and easily fitted to provide comfortable seating for two adults on the lower tailgate, when the vehicle is stationary. The seats come complete with a luxury storage bag with soft lining, which also acts as a useful protective mat to prevent the users' clothes coming into contact with the exterior vehicle surfaces when in use.

Mudflaps

Mudflaps are a popular upgrade for reducing spray and ensuring paintwork is protected from debris and dirt. Designed to complement vehicle exterior styling.

Centre armrest cooler/warmer box

Food and drinks cooler and warmer that acts as a rear centre armrest. With a leather-covered top, it is held in place by the centre seat belt and powered from the rear auxiliary socket. Ideal for long journeys with the family.

Roof rails

Roof rails facilitate easy fitment of cross bars for roof carrying. Preset positioning points ensure cross bars are fixed in optimum position for weight distribution and dynamics.

Cross bars*

Elegant, durable Bright finish aluminium cross bars, with T-track design which utilises the full length of the bars, providing space to mount multiple accessories. Aerodynamic profile minimises drag and wind noise. The incremental height when fitted is 93mm.

Luggage carrier*

Flexible rack system to facilitate roof carrying. Maximum load capacity of accessory is 75kg.

Tailgate Event Seating in Ebony leather

Centre armrest cooler/warmer box

TOURING

Public charging cable

The public charging cable provides an upgrade from the standard home charging cable, helping to reduce the time required for charging. The six metre long, public cable can be used with a universal-style A/C wall box (which does not feature a tethered cable), to provide a fast charging solution at home. Alternatively, it is compatible with public charging points. When away from home, the cable can be stored in the vehicle's loadspace using a purpose designed storage case and retention system.

iPhone Connect and Charge Dock¹

The iPhone Connect and Charge Dock has been designed to charge utilising the cup holder space in the central console. When connected the iPhone's media is accessible and has the ability to be controlled via the integrated infotainment/audio system. The cut-out design of the holder is such that the home button is also accessible for use when parked. The iPhone USB charger can be easily disconnected if the USB connection is required for other use.

Wireless Phone Charging Cup Holder

The Wireless Phone Charging Cup Holder has been designed to charge utilising the cup holder space in the centre console. The holder will accommodate varying phone sizes securely in place. The charger displays an LED light to indicate when charging, and turns off when complete. Fits phones up to 72mm wide.

Wireless Phone Charging Cup Holder

Public charging cable

PET PRODUCTS

Pet Loadspace Protection Pack

Designed to provide water resistant protection and easy cleaning of the loadspace from wet and muddy paws. Combines the quilted loadspace liner², full height luggage partition and Spill Resistant Pet Bowl.

Pet Transportation Pack

Convenient option to provide a comfortable environment for transporting pets, which can be fitted or removed quickly as and when required. Combines the foldable pet carrier, Spill Resistant Pet Bowl and loadspace rubber mat.

Pet Care and Access Pack

Taking the effort out of transporting pets, this option ensures everything required is to hand to transport pets in comfort. Combines the full height luggage partition, quilted loadspace liner*, Pet Access Ramp and portable rinse system.

Quilted loadspace liner²

A tailored liner which covers and protects the loadspace floor, second row seat backs and loadspace side walls up to window height. Manufactured from a soft quilted fabric, with an integral rubber mat and detachable bumper protector, it is ideal for owners who regularly carry pets in the loadspace of their vehicle.

Foldable Pet Carrier

The Foldable Pet Carrier provides a safe, comfortable environment for the transportation of pets. Manufactured from a durable 600D nylon, the foldable pet carrier has a lightweight metal frame and includes a quilted fabric cushion, net windows and a spring loaded locking mechanism which snaps into place when required. Windsor leather carry handles and corner pieces provide a premium finish, with a side pocket providing a convenient stowage option for other pet accessories or small items.

Pet Loadspace Protection Pack

YOUR PEACE OF MIND

CUSTOMER SERVICE

When you bring your Land Rover to us, we use cutting-edge diagnostic equipment to assess all your vehicle's mechanical and electronic systems. Our qualified technicians use tools specifically designed for our vehicles and only fit genuine Land Rover parts and Gear accessories. A choice of service plans are available which, together with Roadside Assistance, ensures complete peace of mind.

For further details contact your local Land Rover Retailer or search 'Land Rover Ownership'.

LAND ROVER ROADSIDE ASSISTANCE

Land Rover Assistance provides assistance in motoring emergencies, from immobilisation due to breakdown or accident to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, wherever you happen to be.

For further details please consult your Warranty Benefits handbook, contact your nearest Land Rover Approved Service Centre or search 'Land Rover Roadside Assistance'.

IMPORTANT NOTICE: Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles, parts and accessories and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications or availability, nor does it constitute an offer for the sale of any particular vehicle, part or accessory. Distributors and Retailers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation.

Images are provided for illustrative purposes only. Colours reproduced on-screen may vary compared to actual finish. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Retailer.

TECHNICAL SPECIFICATION

If not enclosed, please contact your local Land Rover Retailer.

LAND ROVER FINANCIAL SERVICES

Getting the keys to your very own Land Rover has never been so simple. And it's more affordable than you might think. New or used, for personal or business use, we have an option that puts you in complete control.

For further details contact your local Land Rover Retailer or search 'Land Rover Finance'.

FLEET AND BUSINESS

Land Rover is dedicated to being the premium manufacturer of choice for fleets and businesses, by providing a highly attractive range of vehicles and exemplary customer service. Distinctive, capable and versatile, all Land Rover vehicles deliver low Total Cost of Ownership through strong residual values, competitive service, maintenance and repair costs, and impressive fuel economy and CO₂ emissions.

We are also committed to providing a totally customer-focused aftersales service, which will ensure every Land Rover vehicle is kept on the road and in top condition, in the easiest and most cost-efficient way for businesses.

Search 'Land Rover Fleet and Business' for full details.

Distributors and Retailers are not agents of Jaguar Land Rover Limited and have absolutely no authority to bind Jaguar Land Rover Limited to any express or implied undertaking or representation.

Turning Circle

Kerb-to-kerb 12.3m (LWB 13.1m)
 Wall-to-wall 12.7m (LWB 13.4m)
 Turns lock-to-lock 3.03

Wading Depth

Maximum wading depth 900mm††

Width 2,073mm mirrors folded
 Width 2,220mm mirrors out

Front wheel track 1,693mm

Height
 SWB 1,869mm
 LWB 1,868mm

Rear wheel track 1,685mm

	A	B	C
Ride Height	Angle Approach	Ramp Angle	Departure Angle
Off-road (SWB/LWB)	34.7°	28.2° / 25.6°	29.0°
Standard (SWB/LWB)	25.5°	21.5° / 20.0°	24.5°

*Rear loadspace capacity is reduced on P400e models. **Dry: Volume as measured with VDA-compliant solid blocks (200mm x 50mm x 100mm). †Wet: Volume as measured by simulating the loadspace filled with liquid.

††Wading depth (25 deg entry and exit) 750mm, Deep Fording depth (9 deg entry and exit) 900mm.

Figures shown may differ for 5.0L V8 Supercharged 565PS.

Please note: Figures related to both Standard Wheelbase (SWB) and Long Wheelbase (LWB) models unless stated.
